Northeast Preliminary Fisheries Statistics

Multispecies (May - June 1999) & Scallop (March - June 1999)

Fishery Statistics Office Northeast Regional Office National Marine Fisheries Service Gloucester, MA 01930

September 1999

The preliminary fisheries statistics indicating stock areas and gears in this report were derived by prorating available dealer weighout and vessel log data. These preliminary statistics, therefore, represent the currently available information, but are subject to revisions in the future.

Note: Data of selected species are reported in detail (see table of contents).

- 1. Landings in live weight.
- 2. Connecticut landings are estimated for the May-June 1999 period.
- 3. Gear data are based on vessel trip reports.
- * Fishing Year is May 1 through April 30.
- ** For the 7 species under the Multispecies FMP other than cod, haddock and yellowtail flounder.

1. The three digit statistical areas defined below are for statistical and management purposes and may not be consistent with stock area delineation used for biological assessment. (see the attached statistical chart).

Sea Scallop Stock Areas:
 Gulf of Maine: 511-515.
 South Channel: 521, 522, 526.
 Georges Bank North: 561, 562.
 Georges Bank South: 525.
 Southern New England: 537-539.
 New York Bight: 611-616.
 Delmarva: 621-623, 625-627.
 Virginia/North Carolina: 631-638.

- 2. Landings in meatweight.
- ${\tt 3. \ State\ landings\ for\ Connecticut\ are\ estim\ ated\ for\ the\ March-June\ 1999\ period.}$
- 4. Geardata are based on vessel trip reports.
- * Fishing Year is March 1 through February 28.
